

KULDEEP CHOUHAN

Python Backend Developer

Kuldeepchouhan1301@gmail.com | +91 7976219951 | Abu-Road, Rajasthan

LinkedIn: linkedin.com/in/kuldeepchouhan1301 | GitHub: github.com/kuldeepchouhan1301

SUMMARY

Python Backend Developer skilled in Django, Flask, REST API development and SQL databases. Experienced in building scalable web applications, authentication systems, automation scripts, and deploying production projects. Strong foundation in OOP, Data Structures, MVC architecture, and backend optimization.

TECHNICAL SKILLS

Languages: Python, PHP, SQL, HTML, CSS, JavaScript

Python Libraries: Pandas, NumPy, Matplotlib, Requests

Frameworks: Django, Flask, Bootstrap 5

Databases: MySQL, SQLite, Database Design

Developer Tools: Git, GitHub, Linux, VS Code, Postman

Backend: REST APIs, OOP, MVC, Authentication, Session Management

Deployment: Apache, cPanel, Hosting, Git Deployment

Concepts: DSA, SDLC, Agile, Debugging, API Testing

INTERNSHIP EXPERIENCE

Cybersecurity Intern

September 2025 - October 2025

Codec Technologies Pvt. Ltd.

- Automated security log analysis workflows using Python scripts, reducing manual verification tasks.
- Performed vulnerability assessment for web applications including SQL Injection, XSS, and authentication issues.
- Worked with security tools and documented mitigation strategies following secure coding practices.

PROJECTS

MBVM School Website (Live)

HTML | CSS | JavaScript | PHP | MySQL

BCA Major Project | 2026 | madhusudanschoolmungthala.co.in | github.com/kuldeepchouhan1301/MBVM-School-Website

- Developed and deployed production school management platform with 10+ modules including admissions, results, events and admin dashboard.
- Built PHP/MySQL backend with authentication, CRUD operations, file handling and data management.
- Integrated Google Sheets automation and CSV export features reducing manual administrative work.
- Optimized assets, routing and deployment configuration for improved performance.

Arkitektur - Architecture Showcase Website

Python | Django | SCSS | JavaScript | SQLite

Personal Project | 2025 | github.com/kuldeepchouhan1301/arkitektur-django

- Developed Django web application following MVT architecture with modular apps, models, views and templates.
- Implemented database models using Django ORM with SQLite for efficient data storage and retrieval.
- Built dynamic routing, authentication-ready structure and scalable backend architecture.

Student Performance Analysis System (AI-Powered)

PHP | MySQL | Bootstrap 5 | Chart.js

Academic Project | 2025

- Built full-stack student analytics platform with role-based authentication for students and admins.
 - Developed PHP/MySQL performance engine using marks, attendance and assignments to generate student insights.
 - Created dashboards using Chart.js with reports, visual analytics and admin management features.
-

EDUCATION

Bachelor of Computer Applications (BCA)

2023 - 2026

Adarsh College of Professional Studies, Aburoad, Rajasthan | CGPA – 7.27

ACHIEVEMENTS AND EXTRACURRICULARS

- Built and deployed 3 full-stack applications using Python/Django and PHP/MySQL.
 - Developed production website handling admissions, results and administrative operations.
 - Completed cybersecurity internship focusing on secure web development practices.
-
